

Actors and their goals

Actors and their goals:

Actors	Goals
Human Player(s) (primary actor)	The user's goal to is get the target chip by using smallest number of moves as possible. Another goal is to win the game.
AI (primary actor)	Its goal to is get the target chip by using smallest number of moves as possible. Another goal is to win the game.
System administrator (support actor)	Sets up the game, registers the bid number made by the players, checks which player has the lowest bid number, rules the game, in other words, making sure that the actions taken in the system by the user is valid and executable for fair playing of the game. Also, announces winner.
